

Register for an on-site flu clinic today.

CVS Pharmacy offers convenient, in-community vaccination services for residents and employees by providing easy access to flu shots and other vaccines.

Visit [CVS.com/FluClinic](https://www.cvs.com/FluClinic) to schedule your clinic.

Up to
20%
of the
population,
on average,
contracts flu
every year⁵

70–85%
of seasonal flu-related deaths have
occurred in people 65 years and older¹

50–70%
of seasonal flu related hospitalizations
occur in people 65 years and older²

40–60%
reduction in flu contraction rate in healthy
adults who receive vaccinations³

Vaccine benefits for residents and employees

- Access to high-dose and quadrivalent flu shots at no additional cost⁴
- Additional vaccines offered include but are not limited to: Chicken Pox, Hepatitis A, Hepatitis B, HPV, MMR, Meningitis, Pneumonia, Shingles, and Tdap/Whooping Cough (work with your local CVS pharmacist for quantities and insurance coverage for each resident prior to clinic)

Additional community benefits

- Access to more than 9,800 CVS Pharmacy retail locations, including CVS Pharmacy in Target
- Marketing support tools to encourage resident and employee participation
- Support to ensure seamless implementation and execution

It's easy to schedule a clinic

- Schedule an on-site flu clinic by visiting www.cvs.com/fluclinic. Your local CVS pharmacist will contact you to confirm all your clinic details. Please note: your requested clinic is not final until confirmed with the pharmacist.
- For assistance scheduling, please contact your Omnicare[®] representative or reach out to FluShots@CVSHealth.com for more information

Influenza and Pneumonia

- Because the flu virus can often lead to viral pneumonia, adults age 65 and older should also receive the pneumonia shot in addition to the seasonal flu vaccine.⁶
- Both Prevnar13 and Pneumovax23 are available at on-site flu clinics for eligible individuals.

Frequently Asked Questions

Q: How does an on-site vaccination clinic work?

A: Trained and certified CVS pharmacists will come to your community to administer flu shots and other vaccinations to your residents, and if needed, your employees.

Q: What communities are eligible for an on-site vaccination clinic?

A: A minimum of 24 vaccinations is required per clinic and communities must be located within 75 miles of a CVS Pharmacy within the same state (including those located within Target stores). Due to state regulations, not applicable in SD or WY.

Q: How are vaccines billed during the clinic?

A: CVS Pharmacy will bill each recipient's insurance for vaccines. CVS Pharmacy accepts most major benefits and medical plans, along with Medicare Part B, and there is frequently no copay for the flu shot. Individuals are encouraged to contact their insurance providers to identify vaccination coverage.
